

ONGOING STUDIES:

OTSEGO LAKE WATERSHED MONITORING:

2002 Otsego Lake water levels

Willard N. Harman
Kathy S. Ernst¹

The following data were collected at the Biological Field Station and illustrated by K.S. Ernst. Lake surface elevations are given in cm above or below mean water level (364.1 m above sea level). Typical indications of “ice on” and “ice out” are not provided as the lake did not freeze this season (for the first time since records have been kept in 1842).
