Things to Think About

- It is important to build new member class unity but, chapter unity is more important.

- What are you teaching your new members? “What” to think or “how” to think?

- Educate new members to be better people, not better members or pledges.

- You should be developing leaders, not training followers.

- Learning does not end with activation into the organization. Education should be ongoing.

This will allow for New Members to better plan and manage their time, as well as know in advance any commitments they may have.
As the New Member educator, it may be very important to break negative habits and ideals that your organization may hold towards New Members.
