

I joined Greek Life because

By Evan Grodzitsky, Chi Phi Fraternity (ΧΦ)

Coming into college, the thought of joining a fraternity rarely crossed my mind. Although I was not sure on whether or not I even wanted to join one, one thing that I knew for certain is that I would ultimately go recognized instead of unrecognized, for many, many reasons. For all of my freshman year, I did not join a fraternity and lived the college life as most students do. It wasn't until a group of my closest friends in the spring semester of their freshman year joined that I really got interested. I decided that I wasn't ready yet, and chose to wait until the fall semester of my sophomore year. In the time before I joined Chi Phi, I spent a lot of time with the guys both on and off campus and knew that this fraternity was meant for me. Since then, I have never looked back. Joining the Zeta Theta Chapter of the Chi Phi Fraternity has changed my life for the better in so many ways. I am now a better student, a better friend, a better leader, and overall a better person. I have modeled my life after the teachings of my fraternity, and I wouldn't trade it for the world. Chi Phi, so far, has given me the ultimate college experience and so much more. I know that down the road in life I will look back upon these years, and give a lot of thanks to Greek Life, for where it has gotten me today and where it will ultimately get me in the future.
