

BALD EAGLE PRESENTATION

Please join the Geography Department's Environmental Planning class on Tuesday, December 11, 2007 at 7:00 pm in the Red Dragon Theatre, Hunt College Union for a presentation on the bald eagle.

Scott Van Arsdale, a Wildlife Technician with the New York State Department of Environmental Conservation (DEC) and eagle specialist, will present a 1 ½ hour digital slide show including over 100 photographs of eagles in the northern Catskills area. Scott will explain how the bald eagle was extirpated from New York, then re-introduced and brought back to viable population levels. Focus will then shift to the present, and will move through a calendar year, explaining seasonal influences and activities of the eagles as well as DEC's work with the birds, including anecdotes of Scott's field experiences.
