NOTES

1. Plant shrubs with an average spacing of 3.0' - 4.0' on center in a random/natural pattern.

2. Space 20% of the shrubs within a planting area at 2.0' to 5.0' on center (0.5 C) to achieve a natural appearance.

3. Plant plug species in minimum groupings of 30 within areas shown on the plan.

4. Apply wetland meadow seed mix and wetland shrub seed mix over the entire wetland mitigation area.
